

PUBLIC HEALTH FOUNDATION

Innovative Solutions. Measurable Results.

VISION
A high-performing public health system that protects and promotes health in every community.

MISSION
Improving public health infrastructure and performance through innovative solutions and measurable results.

- VALUES**
- We are driven in the initiatives we pursue by our mission.
 - We recognize the essential role of governmental public health.
 - We explore and examine issues with objectivity and neutrality.
 - We recognize staff excellence.
 - We provide high quality services and products with a strong customer focus.
 - We strive for excellence through continuous quality improvement.
 - We believe that policy and practice should be guided by evidence.
 - We value the contributions of diverse sectors comprising our public health system.
 - We practice integrity in all of our work and partnerships.
 - We are accountable for the decisions we make and the work we perform.
 - We recognize the important role the United States plays in global health. We pursue our activities with entrepreneurship, creativity, and innovation.

The Public Health Foundation (PHF) is dedicated to achieving healthy communities through research, training, and technical assistance. For more than 35 years, this national, non-profit organization has been creating new information and helping health agencies and other community health organizations connect to and more effectively use information to manage and improve performance, understand and use data, and strengthen the workforce.

PHF is incorporated in the District of Columbia as a private non-profit 501(C)(3) organization. PHF is an independent, non-membership organization, governed by an eleven-member Board of Directors composed of two state health officers, two local public health officers, one local board of health member, and six individuals from academic, private sector, and other public health agency settings.

Providing affordable training and resource materials to public health professionals around the world...

LEARNING RESOURCE CENTER

*Operated by the
Public Health Foundation*

www.phf.org

What is the Learning Resource Center?

The Learning Resource Center (LRC) is:

- Affordable and reliable source of high-quality public health training and resource materials;
- Private-public business solution for federal agencies and other organizations for distributing and marketing training and resource materials; and
- Self-supporting program that helps PHF fulfill its mission to help strengthen and build capacity and infrastructure of public health agencies and systems.

LRC works with the Centers for Disease Control and Prevention (CDC), the U.S. Food and Drug Administration (FDA), and other organizations to disseminate training and resource materials to help strengthen the capacity and infrastructure of public health agencies and systems.

Resources are offered in a variety of formats, including print-based, computer-based and video courses; manuals; posters; guides; reference cards; and patient brochures. Materials include information in such areas as immunization, epidemiology, infectious diseases, preparedness, evaluation, and diabetes.

Local, state, and federal health agencies; schools of public health; universities; medical and nursing programs; pharmacies; hospitals, managed care organizations; libraries; and others use these materials.

How Does LRC Help Its Partners?

- Responds to your needs;
- Saves money on printing and dissemination costs and eliminates your dissemination headaches;
- Assists in targeting the audience, tailoring the marketing messages, and identifying potential uses of your materials;
- Provides maximum exposure for training and resource materials, promoting resources through targeted communications and conferences;
- Keeps you informed about the individuals and organizations receiving your materials; and
- Provides exceptional customer service to ensure that customers receive what they need, when they need it.

What are our partners saying?

Dr. William Atkinson, Medical Epidemiologist, National Immunization Program, CDC states:

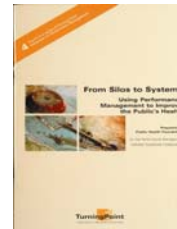

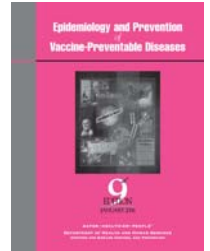

PHF's Learning Resource Center (LRC) has been the sole distributor for "Epidemiology and Prevention of Vaccine-Preventable Diseases" (The Pink Book) for six years. Since this time, we have saved hundreds of thousands in printing and distribution costs for this resource. We no longer print the "Pink Book" ourselves; PHF provides us with the necessary copies that we need and handles all of the troubleshooting that comes with it. The arrangement works perfectly!"
