

To sustain the momentum from this meeting, the Fifth Annual PHSR Leadership Forum, which will be held during the APHA Annual Meeting in December 2005, will provide an opportunity to present the vision for PHSR to a wider audience and to strategize further on advancing the field. The Forum will also feature a panel of funders who will advise researchers on how to make the case for PHSR support.

The collaborative efforts of a wide range of funders and stake holders will be necessary to equip the practice community with the knowledge needed to build a system that can best protect the health of the American people.
